**PM400911001** **VANGUARD**  
 10,000 Maximum Standby Watts  
 Just want to ensure that your family stays safe and comfortable with the basics? The PowerStation 10000 is your first choice.

**PM400911** **HONDA ENGINES**  
 10,000 Maximum Standby Watts  
 Looking to power the same basics but wanting the features of the quiet Honda engine? Then the 20hp 10kW model with added sound dampening material is the right choice.

**PM401211** **HONDA ENGINES**  
 11,500 Maximum Standby Watts  
 Want to be able to run more appliances during an outage? The PowerStation 11500 offers more power for larger loads & features the quiet 24hp overhead valve Honda engine.

**PM0621512.01** **VANGUARD 3/4C**  
 15,000 Maximum Standby Watts  
 For greater use of the number of appliances, choose the PowerStation 15000. The liquid cooled engine/generator offers longer life and more power. This unit is equally at home in residential as well as small business settings.

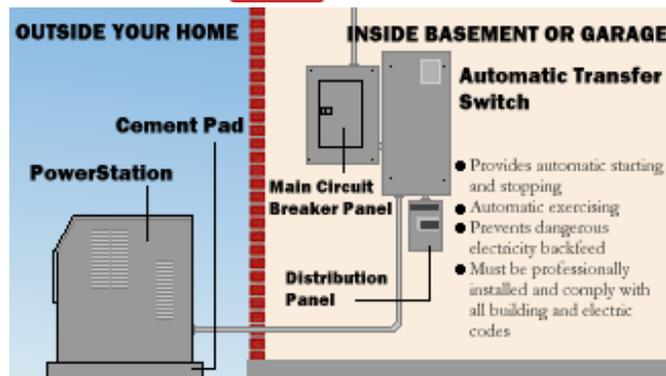

**PM402511**  
 25,000 Maximum Standby Watts  
 Look for the super quiet PowerStation 25000 if you need full home, or small business back-up power, with the maximum number of circuits powered.

While the PowerStation units run all items listed here intermittently, they may not run all the items listed simultaneously. These items are an estimate of average appliance wattages. Always consult the manufacturer's nameplate on the item or appliance you wish to run for exact wattage and amperage requirements.
